High Efficiency
High Score

- Do you have any specific plans for your further study / if you are admitted?
- What do you expect to achieve during your study here?
- Could you tell us something about your plans in your postgraduate study?

High Efficiency Score

About my study plan, I want to divide it into three parts. In the first year of my postgraduate study, I will pay my attention to the knowledge of my major. Although I have learnt the essential part of this field, it is not enough for my further study. The academic resources of your library are abundant, which is one of my reasons to study in your university. In my second year, I am longing for conducting some academic researches based on what I have learnt. If I have the chance to be an intern in relevant organizations or companies, it will be favorable for me to put what I learnt from books into practice. The School of Foreign Studies of your university can provide great platforms and opportunities for my further researches and practice in this field. In the third year, the importance will be attached to the dissertation. I believe, under the professional guidance of the experts and scholars in Renmin University of China, I can complete my dissertation smoothly.

关于学习计划，我想将其分为未来三年的计划。研一时，我将专注于专业知识。尽管我已经掌握了该领域的基本知识，但还不足以开展进一步研究。贵校图书馆的学术资源丰富，这是我想来贵校学习的原因之一。研二时，我想根据自己的所学知识进行一些学术研究。如果我有机会在相关组织或公司进行实习，那对我毕业找工作将是有利的。贵校的外国语学院可以为我在该专业领域的进一步研究、实践提供很好的平台。研三时，我的重点是毕业论文，我相信，在中国人民大学的专家学者专业的指导下，我会更好地完成我的毕业论文。

High Efficiency
High Score

- What would you like to be doing five years after graduation?
- Do you think you will study further or find a job after achieving the master degree?

Five years after graduation with a master's degree in business administration, I would pursue a career in this field and would like to see myself in a position of junior business analyst. Hopefully with the research skills and analytical skills I gained under professors' guidance during postgraduate studies, I would be competent enough to work with the management, assisting in planning and executing major business projects, such as developing an e-commerce strategy, as well as improving operating procedures. With sufficient experience and specialized knowledge accumulated on this position, I could later apply my skills to a specific domain such as health, which I'm passionate about.

在获得工商管理硕士学位毕业五年后，我想在继续在这个领域谋求一份事业，并希望成为一名初级商业分析师。希望凭借研究生期间在教授的指导下获得的研究能力和分析能力，我能够胜任我的工作，协助管理层策划和执行重大商业项目，如制定电子商务战略，改进运营流程。在这个职位上积累了足够的经验和专业知识之后，我希望以后能够把技能运用到我所热爱的特定领域，比如健康。
