- **问题：** Nowadays, artificial intelligence has developed in a speedy way. And the transfer of one language into another language becomes more accurate in machine translation. Those new changes may bring challenges to human translation. Many people think machine translation will replace human translation. What do you think of this statement?
- **开场：** **It is a well-known fact that** artificial intelligence has experienced a speedy development. **In fact**, this may bring challenges to human translation. Many people think machine translation will replace human translation. **Then why** are there so few successful AI translation tool on the market?
